

Панел: БЕЗБЕДНА И ОДРЖИВА МОБИЛНОСТ

Mirko Krsmanović is environmental civil engineer in recent years working as a Design Engineer and Project Manager. For the last 2 years he has been working as adviser within the City of Ljubljana first in the European Project Office and now in the Department of Economic Activities and Transport, Sustainable Mobility Section. Main line of his contribution is in the area of implementation of the mobility strategies, giving back public space to the community, improving the use of active mobility. He is engaged as a partner in the Ljubljanica River navigability project and as a team member (CEF european project X4ITS) in the implementation of ITS and C-ITS technologies

in the transport environment of City of Ljubljana.
